Interactive

Research suggests a physical book may offer certain benefits over a digital one. In response, nVizn Ideas created the best of both worlds: physical books employing technology to extend and enhance the fun and learning. These interactive books use children's stories & beautiful picture books to launch children on a lifelong love of science & learning.

Children's Literature

Integrating children's literature and science is nVizn's approach to ensuring that children always look for and see connections to this awe-inspiring world. Charming & engaging stories provide ample opportunities to learn important science ideas.

Science & Nature

Science is best learned by making connections that serve as a foundation for building a child's understanding of increasingly complex ideas. Encouraging children to formulate questions and use evidence to support their ideas is the basis of all of nVizn's work.

Sounds of the Sea

A Child's Interactive Book of Fun & Learning

Brent A. Ford

SOUNDS OF THE SEA

A Child's Interactive Book of Fun & Learning

Earth's glorious ocean is anything but empty of sound. Learn more and hear those sounds using our free app and the QR codes throughout the book. Additional tech-based activities extend the fun & learning.

The purpose of this book is not for children to memorize, or learn to identify, specific sounds. Instead the approach is to introduce young children to the myriad sounds produced by animals that live in and around Earth's ocean and by other phenomena associated with the ocean.

The book prompts children to look for patterns among different sounds. How are sounds alike and different? How are the animals that make similar sounds similar to each other. Is the bottom of Earth's ocean similar from place to place like its surface? Encourage this type of thinking in children. Science begins with asking questions and helping children learn this skill is vital to the development of scientific and critical thinking.

25+ sounds, spectacular photographs, and four extension activities.

SRP \$11.95 USD
40 pages
ISBN: 978-1-947348-77-6

Animals from the eastern & southern United States.

ISBN: 978-1-947348-74-5

Animals from the western United States.

ISBN: 978-1-947348-76-9

SOUNDS OF THE NIGHT

A Child's Interactive Book of Fun & Learning

Remember the sounds of a summer evening? Ever wonder what is making them? Learn about the fascinating sounds of the night. Hear them using our free app and the QR codes throughout the book. Additional tech-based activities extend the fun & learning.

The purpose of this book is not for children to memorize, or learn to identify, specific sounds. Instead the approach is to introduce young children to the myriad animal sounds we hear at night and to recognize that different kinds of animals (insects, frogs, birds and mammals) produce those sounds. Why would animals need to make sounds at all?

Upon reflection and through experience,

children may recognize that nighttime can be much *noisier* than daytime. Why might that be? Encourage this type of thinking in children. Science begins with asking questions and helping children learn this skill is vital to the development of scientific and critical thinking.

Lastly, while nighttime sounds are common across many habitats, there is great variation based on the specific animals living within each habitat. The animal sounds included in these books are common in the United States and therefore may not be heard within all backyards.

25+ animal sounds — individual and combined, spectacular photographs, and four extension activities.

SRP \$11.95 USD

A WORLD OF WONDER

A Child's Interactive Book of Wonder

A World of Wonder is an interactive book designed to help children develop a wonder for, and an appreciation of, the world in which we all live. The book combines spectacular images with a variety of verse...from time-honored and classic to new and sometimes humorous.

Using a code reader on a phone or tablet, QR codes throughout the book whisk children off to a variety of tech-based features to enhance the experience. For example, Simon, the nVizn indri (IN dree) leads children to activities, videos and experiments to extend the learning.

Poem narrations are included to help children learn poetic rhythm and rhyme but also because it is quite nice to have something read aloud. And short videos, accompanied by beautiful music, help

children see what a wonderful world we all share.

An example:

A cute poem about the International Space Station seen as a twinkling star is followed by a beautiful image of the Station flying over Earth. An extension activity helps parents and children learn how to spot the space station as it flies overhead. Yes, you can really see it!

This delightful book provides a multitude of opportunities for parents and children to spend quality time together.

40+ poems, spectacular photography, recorded narrations, extension activities, and 9 videos combine to inspire young children.

SRP \$19.95 USD
96 pages

*Author Brent A Ford and Lucy McCullough Hazlehurst collaborate wonderfully in their children's literature phenomenon, **A World of Wonder!** And though the book is crafted specifically for the developing minds of a younger audience, any person can enjoy a recap of the wild, exotic, and beautifully diverse spectacles our earth has to offer.*

DID YOU USE SOAP?

A Child's Interactive Book of Fun & Learning

Did You Use Soap? tells the story of Katelyn, who goes on a wild ride after her father sends her back to the bathroom to wash her hands with a special soap, just for kids. Beautiful watercolors accompany this fast-paced story about a situation that happens in homes across the world....wash you hands for dinner.... did you use soap?....go back and use soap this time!

The book includes tech-enabled features, accessed with a free, "made for kids"

QR Code reader app on a phone/tablet. These features launch children on an additional adventure to figure out what is so special about soap.

This book offers the best of both worlds — a book where children can turn the pages, gaze at the images, sit close to someone and engage interactively.

Charming watercolor illustrations bring the story to life. Three extension activities extend the learning.

THE WATER THIEF

A Child's Interactive Book of Fun & Learning

Marcus loves to solve mysteries. Join him as he tries to figure out who is stealing his grandfather's water. Is it the cows? Or more likely, those sneaky chickens? Expressive watercolor illustrations accompany this cute story.

The book includes tech-enabled features, accessed with a free, "made for kids," QR Code reader app on a phone/tablet. These features whisk children off

on additional adventures to learn about water and why it is so special.

This book offers the best of both worlds — a book where children can turn the pages, gaze at the images, sit close to someone and engage interactively.

Multiple extension activities are accessible with the QR code reader.

SRP \$11.95 USD

ISBN: 978-1-947348-72-1

Interactive Components*

nVizn Ideas' interactive books combine the best of both worlds - a physical book where children can turn the pages, gaze at the images and sit close to a parent or loved-one, as well as a book featuring tech-based, interactive components to extend the learning.

To access the web-based features, readers use a mobile device (phone or tablet) with nVizn's QR Code Reader. The app is FREE and does NOT include advertising or in-app purchases. The system is also designed to be "kid friendly" - meaning that use of the app does not open up the entire Internet to young children. The app only reads codes created by nVizn, so users can access only web content that nVizn creates and maintains. Look for the nVizn QR Code Reader in either the Apple or Google Play app stores.

After downloading the code reader, simply open the app on a phone or tablet, point it at any one of the many codes throughout the book and adventure ensues. The code reader will automatically take users to a webpage for some learning and fun!

An Internet connection is required to access the web-based components.

*See page 21 for information on licensing opportunities for books, app and extension webpages.

Sample Pages

Children's Literature*

*Development is underway to create interactive versions of each of these titles.

ISBN: 978-1-947348-02-8
